

AJ-CHEMICAL-335

Sludge Solubilizer and Dispersant

SLUDGE-BAN represents an industry-recognized, proven method for the rapid elimination of sludge and sediment from oil storage tanks, filters, and lines.

SLUDGE-BAN is a highly concentrated composition of proven, highly active oil enhancers, solvents, surface active agents, water emulsifiers and inhibitors, that work together to effectively provide these critical functions:

- ◆ Dissolving existing sludge and converting it to an oil soluble combustible liquid
- ◆ Purging strainers, filters, and lines free of asphalts, gums and tars
- ◆ Preventing sludge clog-up of foot valves, suction lines, strainers, and nozzles
- ◆ Removing water and controlling condensation formation
- ◆ Reducing sludge-related nuisance service calls
- ◆ Optimizing the combustion efficiency of both distillate and heavy oils
