

AJ-CHEMICAL-342

## Diesel Fuel Cetane Improver

**C-POWER** is formulated with the most up-to-date chemical components developed to cope with the potential problems associated with low cetane rated diesel fuel; permitting direct control of additive treatment by the dealer rather than indirect control at the refinery.

**C-POWER** is a super-concentrated composition of proven highly active cetane enhancers that work together to effectively provide these critical functions:

- ◆ Yielding increases of 4 - 6 points in the cetane number of any diesel fuel
- ◆ Providing quicker starts and faster warm-ups at cold temperatures
- ◆ Increasing ignition efficiency, fuel economy, and engine life
- ◆ Enhancing high-load performance
- ◆ Surpassing the 45 minimum cetane required by most engine manufacturers
