Preventative Maintenance Treatment with Cold Flow Improver

TREAT NOW ANTIGEL is a super-concentrated all-season additive of proven, highly active oil enhancers and antigel agents that effectively provide these critical functions:

- ◆ Yielding cold flow properties typical of at least 30% kerosene blends
- ◆ Maintaining product stability, uniformity and homogeneity
- ◆ Lowering Pour Point and Cold Filter Plugging Point
- ◆ Improving combustion efficiency by destroying soot particles and preventing heavy carbon deposits
- ◆ Removing water and controlling condensation formation
- ◆ Inhibiting corrosion of tanks and lines
- ◆ Dissolving existing sludge gradually while acting to stop further buildup
