

AJ-CHEMICAL 347

Preservative for Distillate Fuels

FUEL GUARD represents an industry-recognized, proven method for the prevention of micro-organisms during storage of distillate product.

FUEL GUARD is a highly concentrated composition of proven, highly active oil preservatives and solvents that work together to effectively provide these critical functions:

- ◆ Creating an environment inconsistent with the growth of micro-organisms
- ◆ Preventing the growth of slime forming bacteria, fungi, yeast, mold, and algae
- ◆ Maintaining clean bulk storage tanks and avoiding any potential for spreading micro-organic growth to customer tanks
- ◆ Ending costly service calls due to fouled heating systems and diesel equipment
- ◆ Economically inhibiting a broad spectrum of organic growth
